CODING PROJECTS

RegisterApp   Spring 2020
Register Web application for a supplement retail store. I built a menu interface using Vuejs and work with a team of 4 people in software engineering course to create this app. In this project I learned Vuejs framework, JavaScript, git and API.

Calculator Application   Fall 2020
Simple calculator app that works on android phone.

To do list   Fall 2020
Android application that can create a to do list. It can create, delete, update and set up a due date for a task that needed to be done. Written in java.

Personal budget   Fall 2020
An android app that helps managing money. It can create budgets, keep track of transactions and analyze transactions to help you budget better.

Rest Client   Fall 2020
Android app that implements a REST Client interface and the front-end for a mock blog. This app can retrieve posts, comments and user's information from a webpage, using Restful API.
